

## How the Compatibility Chart Works

Our 16 personalities compatibility chart shows which matches are most and least compatible according to your personality type. **Click on each of the squares to learn about each relationship match.** We are working on adding more information every day. So, check back daily to see if we have anything new for you.

TypeMatch is the headquarters for personality and love. We have tons of additional resources for each personality type.

If you're not sure about which personality type you are, take our [free personality quiz](#) to find out.

We use this same compatibility information plus more in the [TypeMatch app](#) – a free dating app to find love and friendship based on personality type compatibility.
